

CMTA SHARES NEW MEMBERSHIPS FOCUSED ON EFFICIENCY AND SUSTAINABILITY

Apr. 21, 2022

Sacramento, CA - The California Manufacturers & Technology Association (CMTA) today announced [Bellspring Automation LLC](#) and [Nature USA](#) as two of the Association's newest members.

"Manufacturing is the catalyst for California's innovation economy with more than 30,000 manufacturers calling the Golden State home," said Lance Hastings, CMTA's President & CEO. "Roughly 25,000 of those manufacturers are small- to medium-sized companies focused on creating the future by first making a difference in their immediate communities. We are proud to have two such companies join CMTA, and look forward to uplifting their voice and good work."

California leads the nation in tech businesses with technology accounting for nearly one-fifth of the economic value produced in the state - the \$520 billion that it contributes represents more than a quarter of all U.S. tech output. Established in 2004, [Bellspring Automation LLC](#) moved its headquarters to Irvine, California in 2017.

"California's diverse economy is emboldened by its unmatched relationship with technology - a fact that nobody knows better than CMTA members," said Nancy Liaw, Director at [Bellspring Automation LLC](#). "As we develop the most efficient A.I. based software and system integration for total operational and quality control, custom-building all necessary hardware, from the heart of inland Southern California, we are honored to join CMTA and to firmly stand on that cutting edge, in a state that leads as the global center of innovation."
